# Lumbar Intervertebral Fusion Cage System

## Indications

- The Lumbar Intervertebral Fusion Cage is indicated for degenerative lumbar and lumbosacral conditions requiring segmental fusion. Please refer to the surgical technique for a complete list of indications and contraindications.

## Features & Benefits

- Radiolucent PEEK material allows the growth of the bone through the center hole of the cage to be visualized - built-in X-ray markers for cage visualisation
- Sharp teeth on implant surface promote primary stability and prevent cage migration
- Curved and wedge-shaped design accommodates endplate shape variance

## Implants

### Lumbar Intervertebral Fusion Cage

P/N	Specification	Material
55826022E	8×22	PEEK
